Courage, dedication, the strength to persevere and at the same time dare to be vulnerable — these are the pillars of the work of 143 students leaving their academy this year and exhibiting their work. More than in previous years, their resilience, discipline and inventiveness amaze us. How, in the midst of this bizarre year, they found and followed their own path. How they, without giving in, without concession, made their work with conviction, in a world that rolled from amazement to horror: it fills us with genuine pride.

We are grateful to be able to show the work of the students of the Creative Writing, Fashion Design, Fine Art, Graphic Design, Design Art Technology, Product Design, and Educators in Art & Design programs to the public. The moment has arrived, the stage is theirs. The time has come to let ourselves be carried away, high, higher and higher. Per aspera ad astra, through hardships to the stars.
